Cengild Medical Bhd (Technical Buy)

- Following a retracement of 31% from a high of RM0.58 in mid-September 2022 to as low as RM0.40 on 11 October 2022, CENGILD’s share price has subsequently shifted its direction to an uptrend by forming a series of higher highs and higher lows along the way before closing at RM0.485 yesterday.
- Chart-wise, the stock is set to bounce off from the bottom range of the ascending channel in view of the following positive technical signals: (i) the stochastic indicator has started to climb out from the oversold zone, (ii) the MACD is on the verge of crossing above the signal line, and (iii) the stock price has cut above the 21-day EMA.
- Ergo, the stock is poised to challenge our resistance thresholds of RM0.545 (R1; 12% upside potential) and RM0.58 (R2; 20% upside potential).
- Our stop loss is set at RM0.43, which translates to a downside risk of 11%.

- From a valuation standpoint, the stock is currently trading at a Price/Book Value multiple of 4.4x based on its book value per share of RM0.11 as of end-September 2022.

- On the chart, the stock price is expected to maintain its upward momentum on the back of the strengthening buying interest as the RSI indicator is rising while the MACD is on the verge of crossing above the signal line amid an emerging Parabolic SAR uptrend.
- With that said, the stock could advance towards our resistance targets of RM0.24 (R1; 12% upside potential) and RM0.26 (R2; 21% upside potential).

Technical Terms:

Reversal Candlesticks	Patterns	Description
Doji Dragonfly Doji (Bullish) Gravestone Doji (Bearish)		Dojis form when a security's open and close are virtually equal. The length of the upper and lower shadows can vary, and the resulting candlestick looks like, either, a cross, inverted cross, or plus sign. Doji convey a sense of indecision or tug-of-war between buyers and sellers.
Engulfing Pattern		A reversal pattern that can be bearish or bullish, depending upon whether it appears at the end of an uptrend (bearish engulfing pattern) or a downtrend (bullish engulfing pattern). The first day is characterized by a small body, followed by a day whose body completely engulfs the previous day's price action.
Hammer (Bullish) Shooting Star (Bearish)		Hammer candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low. This appears in a downtrend. In contrast, the Shooting Star pattern appears in an uptrend. It opens higher, trades much higher, then closes near its open. It looks just like the Inverted Hammer except that it is bearish.
Inverted Hammer (Bullish) Hanging Man (Bearish)		The Inverted Hammer is a single-day bullish reversal pattern. In a downtrend, the open is lower, then it trades higher, but closes near its open price, therefore looking like an inverted lollipop. Hanging Man candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low.
Harami Harami Cross		The Harami is a two-day pattern that can be bullish or bearish. It has a small body day completely contained within the range of the previous body, and is the opposite colour. The Harami Cross is similar to the Harami. The difference is that the last day is a Doji.
Marubozu		A Marubozu candlestick has no shadow extending from the body at either the open, the close or at both.
Morning Doji Star (Bullish) Evening Doji Star (Bearish)		A Morning Doji Star (Evening Doji Star) is a three-day candlestick bullish (bearish) reversal pattern - a long-bodied black (white) candle extending the current downtrend, a short middle candle that gapped down (up) on the open, and a long-bodied white candle that gapped up (down) on the open and closed above (below) the midpoint of the body of the first day.
Spinning Top		Spinning Tops are candlestick lines that have small bodies with upper and lower shadows that exceed the length of the body. They are similar to the Doji candlesticks, and signal indecision.
