More Well Intervention Jobs

By Lim Sin Kiat, CFA / limsk@kenanga.com.my

UZMA has won multiple coiled tubing projects from Petronas Carigali spanning five years up to 2031. The order value was not disclosed; hence, we deemed the win largely within our expectations, subject to further upward revisions if we see more signs of ramp-up in work orders from these works. Already a second well-related win this month which signifies Petronas' intention to ramp up its brownfield production, this bodes well for local upstream service providers. We maintain our forecasts, TP of RM0.70 pegged to 7x PER target and OUTPERFORM call.

UZMA has been awarded multiple coiled tubing projects from Petronas Carigali, with works comprising of well interventions, idle well reactivations, and production enhancement as well as some well completion jobs. The contracts won span five years commencing from Feb 2026 to Feb 2031 though no contract value was announced. Based on historical wins, contract of these type averages around RM100m/year, which indicates that the win could be worth RM500m in total or higher as this round, the work scope could be more.

FY26F YTD wins were at c.RM800m, c. 89% of our full-year replenishment forecast but we still deem the win within our expectations as work orders might take time to ramp up in the first year of execution (work recognised based on work order). Nevertheless, this is an early positive sign for the company as well as the subsector as it shows indicative intention from Petronas to ramp up production of its existing wells to ensure better energy security.

Forecasts. Maintain.

Valuations. Correspondingly, we maintain our TP at RM0.70 pegged to unchanged FY27F 7x PER, pricing in near-term uncertainties in the upstream segment and reflective of its highly geared balance sheet. The 40% valuation discount to our target 10x PER for upstream service providers is deemed extremely conservative given that the group is still showing consistent earnings growth.

There is no adjustment to our TP based on ESG given a 3-star rating as appraised by us (see Page 4).

Investment case. We like UZMA due to: (i) resilient oil & gas division business outlook as its forte remains in brownfield jobs which are severely discounted by the market presently, (ii) its active thrust into sustainable businesses via its new energy segment which enhances UZMA's ESG appeal and help future proof its earnings, and (iii) new digitisation segment provides long-term upside from geospatial solutions provision but remain insignificant for the time being. Maintain **OUTPERFORM**.

Risks to our call include: (i) sharp decline in crude oil prices, (ii) poor project execution on new energy division leading to cost overruns and delays, and (iii) opex pressure emanating from an inflationary environment, particularly on expenses for manpower and materials.

Stock Ratings are defined as follows:

Stock Recommendations

OUTPERFORM : A particular stock’s Expected Total Return is MORE than 10%
 MARKET PERFORM : A particular stock’s Expected Total Return is WITHIN the range of -5% to 10%
 UNDERPERFORM : A particular stock’s Expected Total Return is LESS than -5%

Sector Recommendations***

OVERWEIGHT : A particular sector’s Expected Total Return is MORE than 10%
 NEUTRAL : A particular sector’s Expected Total Return is WITHIN the range of -5% to 10%
 UNDERWEIGHT : A particular sector’s Expected Total Return is LESS than -5%

*****Sector recommendations are defined based on market capitalisation weighted average expected total return for stocks under our coverage.**
