PRODUCT HIGHLIGHTS SHEET

AHAM WORLD SERIES – GLOBAL EQUITY FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM World Series – Global Equity Fund is an open-ended wholesale feeder fund that aims to achieve medium to long-term capital appreciation by investing in a collective investment scheme (“CIS”), namely the Nikko AM Global Umbrella Fund – Nikko AM Global Equity Fund.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for Sophisticated Investors who seek capital growth from their investments, have a medium to long-term investment horizon, want exposure into global markets, and are able to withstand more volatile market movements.

KEY PRODUCT FEATURES

3. What am I investing in?

| Classes | SGD Class | MYR class | USD class |
|---------------------|--|-----------|-----------|
| Launch Date | 23 November 2015 | | |
| Tenure | This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Information Memorandum and the provisions of the Deed. | | |
| Base Currency | USD | | |
| Asset Allocation | <ul style="list-style-type: none"> ➢ A minimum of 70% of the Fund’s NAV to be invested in the Target Fund; and ➢ A maximum of 30% of the Fund’s NAV to be invested in money market instruments, and/or deposits. | | |
| Benchmark | MSCI AC World Index <i>The risk profile of the Fund is not the same as the risk profile of the benchmark.</i> | | |
| Investment Strategy | <p>The Fund will be investing a minimum of 70% of the Fund’s NAV in the Target Fund and a maximum of 30% of the Fund’s NAV in money market instruments, and/or deposits.</p> <p>We may substitute the Target Fund with another fund that has a similar investment objective with the Fund, if, in the Manager’s opinion, the Target Fund no longer meets the Fund’s investment objective. However, this is subject to the Unit Holder’s approval before any such change is made.</p> <p>Temporary Defensive Measure We may take temporary defensive positions that may be inconsistent with the Fund’s principal strategy and asset allocation by reducing its investments in the Target Fund and raise the liquidity levels of the Fund during adverse market conditions that may impact financial markets to protect the Unit Holders’ interest. In raising the Fund’s liquidity levels, we may also invest in collective investment schemes that are relevant and consistent with the investment objective of the Fund. To manage the risk of the Fund, we may shift the Fund’s focus and exposure to lower risk investments such as deposits or money market instruments.</p> <p>Derivatives Derivatives trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two financial instruments between two parties.</p> | | |

| Classes | SGD Class | MYR class | USD class |
|---------------------------------------|--|-----------------|-----------------|
| | <p>The intention of hedging is to preserve the value of the assets from any adverse price movements. While the hedging transactions will assist in mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.</p> | | |
| Distribution Policy | The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate. | | |

5. What are the possible outcomes of my investment?

The Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests into global equities. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund, which in turn is

reliant on the performance of the equities that it is invested in.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the Target Fund Manager's expertise in managing the Fund.

This Fund is not expected to make any income distribution. However, due to investments in equities, the Manager expects the Fund to yield incidental growth in capital.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** – Market risk arises because of the factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions taken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant laws or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - This Fund is a feeder fund which invests in another collective investment scheme, namely the Target Fund. The performance of the Fund very much depends on the performance of the Target Fund. If the Target Fund does not perform in accordance with its objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of this Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment returns in accordance with its objective.
- **Inflation risk** - This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan / Financing risk** - This risk occurs when you take a loan / financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan/financing.
- **Risk of non-compliance** - This refers to the risk where the Manager does not comply with the applicable rules, laws, regulations or the Deed. Although not every non-compliance will necessarily result in some losses to the Fund, there is always a risk that losses may be suffered by the Fund. For instance, if the Manager is forced to dispose of any investments of the Fund at loss to resolve the non-compliance. Notwithstanding that, the Manager has imposed stringent internal compliance controls to mitigate this risk.
- **Operational risk** - This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so.
The exceptional circumstances may include, amongst other, suspension of dealing by the Target Fund. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.
- **Related party transaction risk** - The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

Specific risks

- **Concentration risk** - The Fund is a feeder fund which invests in a single CIS. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund. This risk may be mitigated as we are allowed to take temporary defensive positions in response to adverse

market conditions. We are also able to substitute the Target Fund with another fund with similar investment objective of the Fund if, in our opinion, the Target Fund no longer meets the Fund's investment objective subject to Unit Holders' approval. For better understanding of the risks associated to the Target Fund, please refer to the "Risks of the Target Fund".

- **Liquidity risk** – This is the risk that the Shares of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of Shares of the Target Fund. The Management Company / Target Fund Manager may suspend the realisation of Shares of the Target Fund, or delay the payment of realisation proceeds in respect of any realisation request received, during any period in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in a timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders. In managing liquidity risk, we will maintain sufficient liquidity level for the purposes of meeting repurchase requests. Please refer to the "Suspension of Dealing in Units" section of the Information Memorandum for more details.
- **Counterparty risk** - Counterparty risk is the risk associated with the ongoing ability and willingness of the issuers to derivatives ("Investments") to fulfill their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's Investments to mitigate potential losses that may arise.
- **Country risk** - Investments of the Fund in the Target Fund which is domiciled in Luxembourg may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of Luxembourg. For example, the deteriorating economic condition of that country may adversely affect the value of the investments undertaken by the Fund and in turn may cause the NAV of the Fund or prices of Units to fall.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated (other than in USD) depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Fund level

The impact of the exchange rate movement between the Base Currency and the currency of the underlying investments of the Fund (other than in USD) may result in a depreciation of the value of the investments as expressed in the Base Currency.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

- **Target Fund Manager risk** - The Target Fund (which the Fund invests in) is managed by the Target Fund Manager. It is important to note that the Manager has no control over the investment management techniques and operational controls of the Target Fund. Thus, mismanagement of the Target Fund (i.e. breach of its prescribed investment restriction due to human error) may negatively affect the Fund (as an investor of the Target Fund). Should such a situation arise, the Manager may propose to invest in other alternative collective investment scheme that is consistent with the investment objective of the Fund provided always that the approval of the Unit Holders has been obtained.
