PRODUCT HIGHLIGHTS SHEET

AHAM SELECT ASIA PACIFIC (EX JAPAN) BALANCED FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM Select Asia Pacific (ex Japan) Balanced Fund is an open-ended balanced fund, issued and managed in-house by the Manager.

The Fund endeavours to provide investors an affordable access into a diversified investment portfolio containing a balanced mixture of equities and fixed income instruments to achieve a balance of growth and income over the medium to long-term period.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who seek medium to long-term capital growth and regular income distributions.

Launch date	8 December 2014		26 September 2018			
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.					
Base currency	RM					
Benchmark	50% MSCI AC Asia Pacific ex Japan Index + 50% RAM Quantshop MGS All Index <i>The risk profile of the Fund is not the same as the risk profile of the performance benchmark.</i>					
Investment strategy	<p>To achieve its objective, the Fund will be investing in equities and fixed income instruments such as debentures, money market instruments and deposits with Financial Institutions. The Fund will invest primarily in Asia Pacific (ex Japan) companies. The Fund may also invest a smaller portion of its NAV in non-Asia Pacific (ex Japan) companies.</p> <p>A combination of top-down (macroeconomic trends) and bottom-up (fundamental analysis) investment strategies will be adopted when identifying investment opportunities. The Fund will focus on companies that are able to provide growth potential over the medium to long-term investment horizon when investing in equities. Investments in fixed income instruments will take into consideration the interest rate outlook, credit market and currency movement. The Fund will also depend on the respective issuer's ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims priority as well as offer timely payment of interest and principal.</p> <p>To achieve its objective, the Fund will also have the flexibility to hold exposure in warrants, as well as collective investment schemes that have similar investment objectives to the Fund.</p> <p>Temporary Defensive Position We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact financial markets. To manage the risk of the Fund, we may shift the Fund's focus and exposure into lower risk investments such as deposits or money market instruments.</p> <p>Derivatives Derivatives trades may be carried out for hedging purpose through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two (2) parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two (2) financial instruments between two (2) parties.</p> <p>The intention of hedging is to preserve the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of the derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of its NAV at all times.</p>

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	Deutsche Trustees Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is a balanced fund that invests in a diversified portfolio containing a balanced mixture of equities and fixed income instruments within the domestic and Asia Pacific (ex Japan) markets. The performance of the Fund would be dependent on the fixed income securities and equity markets that are investable by the Fund. The Fund's performance is also reliant on the Manager's expertise in managing the Fund to meet its objective.

The Fund's investment into equities would to a great extent, be linked to the price movements of the equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

Unlike fixed deposits which generally provide a guarantee on capital invested and a fixed rate of return, the Fund does not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.

The Manager expects the Fund to yield incidental growth in capital from its equity investments and to derive income from investments in fixed income instruments.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Fund management risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity Risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund.
- **Loan / Financing risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase

towards settling the loan/financing.

- **Operational risk** – This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will regularly review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Suspension of Repurchase Request Risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movement of such stock will adversely affect the Fund's NAV.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the fixed income instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or Financial Institution and/or Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Warrants investment risk** – The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Interest rate risk** – Fixed income instruments are subject to interest rate fluctuations. Generally, movement in interest rates affects the prices of fixed income instruments inversely. For example, when interest rates rise, prices of fixed income instruments will fall. The fluctuations of the prices of fixed income instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the fixed income instruments until their maturity. We also manage interest rate risk by considering each fixed income instruments' sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to fixed income instruments that are less sensitive to interest rate changes. For investments into deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should also note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the SGD Hedged-class may result in a depreciation of your holdings as expressed in the Base Currency.

- **Reinvestment risk** – This risk arises when coupons from fixed income investments are not reinvested at the prevailing interest rate when the investment was initially made. The risk is more likely to take place during a declining interest rate and may impact the yield-to-maturity of the investments which is calculated based on the assumption that all coupon payments made by the investments are reinvested at the same interest rate when the investments were first made. The Manager will mitigate this risk by closely monitoring the interest rate movements and take measures which will not be limited to reduce the Fund's exposure into such investments.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Distribution Out of Capital Risk** – The Fund may distribute income out of capital. Such capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per Unit of the Classes and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.

Note: Please refer to the Fund's Prospectus on further details on each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

RMB Hedged-class

For the period 1 May 2022 to 30 April 2023, the Fund registered a -1.49% return compared to the benchmark return of 3.90%. Since commencement, the Fund has registered a return of 10.63% compared to the benchmark return of 8.11%, outperforming by 2.52%.

Basic of calculation and assumption made in calculating the returns

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return = NAV per Unit end / NAV per Unit begin – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

The previous benchmark of 50% MSCI AC Asia Pacific ex Japan Index + 50% JACI Investment Grade Index have been changed to 50% MSCI AC Asia Pacific ex Japan Index + 50% RAM Quantshop MGS All Index.

As there are currently no direct benchmarks that employ a similar investment strategy to the Fund, the Fund will be employing a composition of the two (2) indices indicated i.e 50% of the MSCI AC Asia Pacific ex Japan Index and 50% of the RAM Quantshop MGS All Index. The different weighting of the benchmark as compared to the Fund's asset allocation is due to the expected effective exposure of the Fund over the medium to long term in meeting the Fund's objective.

The composite benchmark has been selected as there is no direct performance benchmark to the Fund's investment strategy. The composite benchmark provides a balanced gauge on the performance of equities and equities linked instruments listed on the Asia Pacific (ex Japan) stock exchanges as measured by the MSCI Asia ex Japan Index. And the fixed income instruments will be measured against the RAM Quantshop MGS All Index. The RAM Quantshop MGS All Index has been selected as it aims to reflect the performance of the investment opportunities related to investments into fixed income instruments. The index represents the performance benchmark relating to interest bearing instruments of similar risk profile.
