PRODUCT HIGHLIGHTS SHEET

AHAM SELECT SGD INCOME FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM Select SGD Income Fund is an open-ended mixed asset fund, issued and managed in-house by the Manager. The Fund endeavours to provide steady income distribution through investments primarily in SGD-denominated assets.

PRODUCT SUITABILITY

2. Who is this product suitable for?

This Fund is designed for retail investors who want exposure primarily to SGD-denominated assets, expect to receive steady income distribution, have a moderate risk appetite and expect incidental growth in capital.

KEY PRODUCT FEATURES

3. What am I investing in?

	RM Class	SGD Class						
Launch date	1 August 2012							
Tenure	The Fund is an open-ended fund where it does not have fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.							
Base currency	SGD							
Benchmark	70% 12-Month Singapore Commercial Banks Weighted Average FD Rate + 30% Singapore's FTSE Straits Times Index.							
Asset allocation	<table border="1"> <thead> <tr> <th>Asset Class</th> <th>% of the Fund's NAV</th> </tr> </thead> <tbody> <tr> <td>Bonds, money market instruments and/or fixed deposits</td> <td>Minimum 60%</td> </tr> <tr> <td>Equities</td> <td>Maximum 40%</td> </tr> </tbody> </table>		Asset Class	% of the Fund's NAV	Bonds, money market instruments and/or fixed deposits	Minimum 60%	Equities	Maximum 40%
	Asset Class	% of the Fund's NAV						
	Bonds, money market instruments and/or fixed deposits	Minimum 60%						
Equities	Maximum 40%							
Please note that we will maintain a minimum of 75% of the NAV of the Fund in SGD-denominated assets and the remaining shall be invested in non-SGD-denominated assets. We will also maintain a sufficient level of cash or cash equivalent for liquidity purposes.								
Investment strategy	<p>The Fund will focus on achieving its objective by investing in a diversified portfolio consisting a minimum 60% of its NAV in fixed income instruments such as bonds, money market instruments and/or fixed deposits, and a maximum 40% of its NAV in equities.</p> <p>As the Fund holds a Singapore Dollar focus, we will maintain a minimum of 75% of the NAV of the Fund in SGD-denominated assets, and have the flexibility to invest the remaining in non SGD-denominated assets.</p> <p>We will combine a top-down and bottom-up investment approach to identify investment opportunities. Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, credit market and currency movement. For its bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligations. For liquidity purposes, we may also invest into commercial papers and placement of fixed deposits with financial institutions.</p> <p>The Fund's investment in fixed income instruments would consist of government and corporate bonds. There will be no minimum rating applicable in selecting individual fixed income instrument or issuer. However, the selection will depend largely on its quality where the respective issuers will have strong ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims priority as well as offer highest safety for timely payment of interest and principal.</p>							

	RM Class	SGD Class
	<p>For its equity portion, the Fund intends to invest in dividend yielding equities that are expected to enhance income and returns to the Fund. The investment selection process will include companies that are able to provide a steady income stream through regular income distribution. As such, we would adopt a bottom-up strategy where individual stock analysis forms the primary building blocks for portfolio construction and stock selection. The Fund focuses on higher dividend paying sectors where cash flows are more resilient, and selected lower dividend yielding stocks with prospects of growing its dividends to achieve an element of capital growth in addition to dividend yield on a total return basis.</p> <p>Key factors which are useful to the identification of such companies would include sales and profit growth, financial strength and gearing levels, capital expenditure levels as well as management commitment to rewarding shareholders via dividends or capital repayments. The dividends provided by these companies would be the primary source of income from which the Fund would then declare income distributions to you.</p> <p>To achieve its objective, the Fund will also have the flexibility to invest in warrants, as well as collective investment schemes that have similar investment objectives to the Fund.</p> <p>The Fund also may invest into foreign markets which are eligible markets.</p> <p>Derivatives Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.</p> <p>The intention of hedging is to protect the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.</p> <p>Temporary Defensive Positions We hold the option to take temporary defensive measures that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions. To manage the risk of the Fund, we may shift the Fund's focus into lower risk investments such as deposits with financial institutions or money market instruments.</p>	
Distribution policy	The Fund will distribute income on a semi- annual basis after the end of the first financial year. At our discretion, the Fund may distribute (1) realised income, (2) realised capital gains, (3) unrealised income, (4) unrealised capital gains, (5) capital, or (6) a combination of any of the above.	
Minimum initial investment*	RM 1,000	SGD 1,000
Minimum additional investment*	RM 100	SGD 100
Minimum repurchase amount*	2,000 Units	2,000 Units
Minimum holding of units*	2,000 Units	2,000 Units

Note: Please refer to the Fund's Prospectus for further details of the Fund.

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	Deutsche Trustees Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is a mixed asset fund that invests in a diversified portfolio consisting primarily of SGD-denominated fixed income instruments, money market instruments, deposits and equities. The Fund's returns would, to a great extent, be linked to performances of the SGD fixed income market and the Singapore stock market. If both markets perform well, the Fund may reflect similar performance.

As opposed to the SGD Class where performance is from an SGD investor's perspective, Unit Holders of the RM Class will have to consider SGD/RM currency movements as it has a great deal of influence on final returns.

Investments in fixed income and money market instruments are expected to generate consistent and regular income. Due to investment in equities, the Manager expects the Fund to also yield incidental growth in capital.

The asset allocation decision between fixed income instruments and equities is decided after considering the fixed income and equity market outlook over the medium to long-term horizon.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Manager's risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan / financing risk** – This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower Net Asset Value per Unit as compared to the Net Asset Value per Unit at the point of purchase towards settling the loan/financing.
- **Operational risk** – This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will regularly review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the NAV of the Fund.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the bonds and money market instruments and the financial institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or financial institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a financial institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Interest rate risk** – This risk refers to the impact of interest rate changes on the valuation of bonds or money market instruments (hereinafter referred to as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the

interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.

- **Warrants investment risk** – The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the RM Class may result in a depreciation of your holdings as expressed in the Base Currency.

- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund and prices of Units to fall.
- **Liquidity risk** - Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund.
- **Regulatory risk** – The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream medias) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.
- **Distribution out of capital risk** – The Fund may distribute income out of capital. Such capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per Unit of the Classes and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.

Note: Please refer to the Fund's Prospectus on further details on the general and specific risks.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

MYR Class

For the period 1 April 2022 to 31 March 2023, the Fund registered a -0.05% return compared to the benchmark return of 6.17%. Since commencement, the Fund has registered a return of 82.27% compared to the benchmark return of 42.28%, outperforming by 39.99%.

SGD Class

For the period 1 April 2022 to 31 March 2023, the Fund registered a -6.48% return compared to the benchmark return of -0.65%. Since commencement, the Fund has registered a return of 38.39% compared to the benchmark return of 6.95%, outperforming by 31.44%.

Basis of calculation and assumption made in calculating the returns:

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return = NAV per Unit end / NAV per Unit begin – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	Up to 3.00% of the NAV per Unit of a Class. <i>Investors may negotiate for a lower charge subject to our discretion.</i> The Sales Charge for investors purchasing Units through the EMIS shall be limited to a maximum charge of 3% of the NAV per Unit or as determined by the EPF.
Repurchase charge	There will be no Repurchase Charge levied on the repurchase of Units.
Switching fee	The Manager does not impose any switching fee. However, if the amount of sales charge of the fund (or class) that the Unit Holder intends to switch into is higher than the sales charge imposed by the fund (or class) being switched from, then the difference in the sales charge between the two (2) funds (or classes) shall be borne by the Unit Holder.
Transfer fee	There will be no transfer fee imposed on the transfer facility.

What are the key ongoing fees charged to the Fund?

Management fee	Up to 1.50% per annum of the NAV of the Fund (before deducting the management fee and trustee fee). This management fee is calculated and accrued daily using the Base Currency.
Trustee fee	Up to 0.08% per annum of the NAV of the Fund calculated and accrued daily (excluding foreign custodian fees and charges) (before deducting the management fee and trustee fee) using the Fund's Base Currency.

Note: Please refer to the Prospectus for further explanation and illustration on the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND / OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.
