

AmPRS-Tactical Bond Class I

March 2024

AmPRS – Tactical Bond (the "Fund") aims to provide returns through income* and to a lesser extent capital appreciation by investing in the AmTactical Bond.

The Fund is suitable for Members who:

- are willing to assume risks associated with investing in securities with long duration (i.e. there will be no portfolio maturity limitation) and low credit ratings (i.e. there will be no minimum rating for the securities purchased or held by the Target Fund).

Notes: *Income distribution (if any) will be reinvested in the form of units.

Any material changes to the investment objective of the Fund would require Members' approval.

Investment Strategy

- The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's NAV in the AmTactical Bond ("Target Fund") at all times. This implies that the Fund has a passive strategy.

PRS Provider's Commentary (as at 29 February 2024)

In the absence of any catalyst both on the domestic and external front, the bond market will trade range bound until there is clarity on the US Fed direction. We anticipate BNM to hold the OPR at 3.0% in the absence of any inflationary pressures or economic slowdown. Should the US Fed embark on interest rate easing, sentiments in the local bond market will correspondingly turn bullish and given that this is expected to happen in 2024, we remain overweight duration against benchmark.

On stock selection, we prefer corporate bonds over government bonds on better relative valuation. Government bond yields have compressed considerably since the end of 2023 and are deemed to be unattractive. Corporate credit spreads are expected to tighten further and offer better potential for trading play and yield pickup.
