PRODUCT HIGHLIGHTS SHEET

AFFIN HWANG SELECT BALANCED FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

Affin Hwang Select Balanced Fund is an open-ended balanced fund, issued and managed in-house by the Manager.

The Fund's investment objective is to provide investors an affordable access into a diversified investment portfolio containing a 'balanced' mixture of equities and fixed income securities to achieve a balance of growth and income over medium to long-term.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who prefer more stable investment returns, are relatively conservative with a bias towards receiving regular income and want a meaningful medium to long-term capital growth.

KEY PRODUCT FEATURES

3. What am I investing in?

Launch date	28 July 2003
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Benchmark	Weighted average of the FTSE Bursa Malaysian Top 100 Index ("FBM 100") performance (for equity investment) and current Maybank 12-month fixed deposit rate, in the proportion of 50:50. <i>The risk profile of this Fund is different from the risk profile of the benchmark</i>
Investment strategy	<p>The Fund will focus on achieving its objective by investing in a balanced portfolio consisting equities, debentures, money market instruments and/or deposits.</p> <p>We will combine a top-down and bottom-up investment approach to identify investment opportunities. When selecting its fixed income instruments such as debentures, money market instruments or deposits, macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, credit market and currency movement. For its bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligations. The selection process would also include analysis on the respective issuer's ability to meet their financial obligations, cash-flow management, collateral type, value, claims priority, as well as ability to offer timely payment of interest and principal.</p> <p>When investing into equities, we will focus on companies that are able to provide growth potential over the medium to long-term investment horizon. As such, we would adopt a top-down and bottom-up strategy investment approach to identify investment opportunities in the prevailing market. Fundamental analysis will also be carried out to determine the attractiveness of investment ideas. Key factors which are useful in identification of such companies would include sales and profit growth, financial strength and gearing levels, expected future earnings growth, share price valuation as well as management quality.</p> <p>To achieve its objective, the Fund will also have the flexibility to hold exposure in warrants, as well as collective investment schemes that have similar investment objectives to the Fund.</p>

Asset Management

	<p>Foreign investments</p> <p>The Fund may invest up to 30% of its NAV in investments listed or issued in foreign markets. The decision to invest into foreign markets will be opportunistically driven where we would seek out investments that could provide a potential to enhance the returns of the Fund. The Fund will invest only into countries where the regulatory authorities are ordinary or associate members of the International Organization of Securities Commissions (IOSCO).</p> <p>Derivatives</p> <p>Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Future and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.</p> <p>Temporary Defensive Position</p> <p>We hold the option to take temporary defensive measures that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions. To manage the risk of the Fund, we may shift the Fund's focus into lower risk investments such as money market instruments and/or deposits.</p>

5. What are the possible outcomes of my investment?

This is a balanced fund that invests in a diversified portfolio of equities and fixed income securities, in domestic and foreign markets.

The performance of the Fund would be dependent on the fixed income securities and equity market that are investable by the Fund. The Fund's performance is reliant on the Manager's expertise in managing the Fund to meet its objective.

However, unlike fixed deposits which generally provide a guarantee on capital invested and carry specific rate of return, the Fund's investments into fixed income securities does not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.

The Fund's investment into equities would, to a great extent, be linked to the price movements of the domestic and/or foreign equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

The Fund endeavours to distribution income, if any, on a semi-annual basis.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** - Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
- **Fund management risk** - This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulent, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - There is no guarantee in relation to the investment returns or on the distribution to Unit Holders.
- **Inflation risk** - This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** - Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund.
- **Operational risk** - This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you.
- **Loan financing risk** - This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.

Specific risks

- **Stock specific risk** - Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Credit and default risk** - Credit risk relates to the creditworthiness of the issuers of the debentures or money market instruments (hereinafter referred as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the

Asset Management

investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.

- **Interest rate risk** - This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.
- **Warrants investment risk** - The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants.
- **Country risk** - Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Regulatory risk** - The investments of the Fund would be exposed to changes in the laws and regulations in the countries the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund.

Note: Please refer to the Fund's Prospectus for further details of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
