PRODUCT SUITABILITY

This Fund is suitable for investors who are looking for investments in a diversified portfolio of assets that comply with Shariah requirements. These investors are willing to accept moderate to high risk in their investments and prefer capital growth rather than income over a medium to long term* period.

**Note: "medium to long term" in this context refers to a period of between 3 – 7 years.*

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with above average capital growth over a medium to long term period* by investing in a carefully selected portfolio of stocks which complies with the Shariah principles.

**Note: "medium to long term" in this context refers to a period of between 3 – 7 years.*

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

90% - 98% of Net Asset Value ("NAV") - Investments in Shariah-compliant equity and equity related securities of companies that have good growth potential.

2% - 10% of NAV - Investments in Islamic liquid assets comprising of cash and Islamic deposits with financial institutions, Islamic accepted bills, sukuk, Cagamas sukuk, Government Investment Issues and any other Shariah-compliant instrument capable of being converted into cash within seven (7) days.

Subject to the range stipulated above, the asset allocation will be reviewed from time to time depending on the judgement of the External Investment Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

For investments in foreign markets, the External Investment Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward.

The risk management strategies and techniques employed by the External Investment Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. Shariah-compliant equity, sukuk, Islamic money market instruments). Islamic financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the Shariah-compliant investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in Shariah-compliant equity value, and other available Shariah-compliant equity investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission Malaysia. Adherence to these permitted investments and restrictions also helps the External Investment Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the External Investment Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

The External Investment Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. However, any position if taken, will always comply with Shariah requirements. In such circumstances, the External Investment Manager may reallocate the Fund's Shariah-compliant equity investments into other asset classes such as sukuk, Islamic money market instruments and Islamic deposits with any financial institutions[^], which are defensive in nature and comply with Shariah requirements. In its reallocation, the level of Shariah-compliant equity investments would normally not be below 20% of the NAV.

[^] These are Islamic deposits that are not embedded with or linked to financial derivative instruments and (where applicable) these are current accounts, short term Islamic money market deposits and short term Islamic deposits with financial institutions.

BENCHMARK

FTSE Bursa Malaysia EMAS Shariah Index.

KEY PRODUCT FEATURES

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective to achieve capital growth, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses, are generally declared annually and will be reinvested.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter. No sales charge will be imposed for any reinvestment of distribution into the Fund.

KEY RISKS

As this Fund invests only in securities of companies whose principal activities comply with Shariah requirements, it may be subject to a higher level of risk than a portfolio diversifying its holdings across several markets and economies. Furthermore, there is an inherent risk, the reclassification of Shariah status risk, where the currently held Shariah-compliant securities in the Fund may be re-designated to be Shariah non-compliant securities in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia, the Shariah adviser of the Fund, or the Shariah boards of the relevant Islamic indices. If this occurs, the value of the Fund may be adversely affected where the Manager will take the necessary steps to dispose of such securities. Any capital gains arising from the disposal of the Shariah non-compliant securities made at the time of the announcement can be kept by the Fund. However, any excess capital gains derived from the disposal after the announcement day at the market price that is higher than the closing price on the announcement day should be channelled to baitulmal or charitable bodies as advised by the Shariah adviser of the Fund. Other risks associated with investments in Shariah-compliant equity are as elaborated below:

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in or global markets and subsequently the value of the Fund's investments.

PARTICULAR SECURITIES RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities will cause the Fund's unit price to rise or fall accordingly.

As this Fund may invest up to 30% of its NAV in foreign markets, it may be subject to further risks, such as currency risk and country risk, when compared to a portfolio which concentrates its holdings in a single market or economy. The country risk and currency risk are as elaborated below:

CURRENCY RISK - Where a percentage of the value of the Fund is invested in foreign currency or assets denominated in a foreign currency, the Fund may be exposed to currency risk. Fluctuation in foreign exchange rates will affect the value of the Fund's foreign investments when converted into local currency and subsequently the value of the investments of the unit holders of the Fund ("Unit Holder(s)"). This risk can be mitigated through investing in a wide range of foreign currency denominated asset thus diversifying the risk of single currency exposure. Hedging may be applied to mitigate the currency risk, if necessary.

COUNTRY RISK - In addition to currency risk, the Fund is also subject to country risk, for example, the value of the assets of the Fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund may invest. Further, when investing in foreign markets, there are countries which may require prior approvals before investment can take place. For example, if and when the Fund invests in countries such as China, Taiwan, South Korea, India and Vietnam, such countries require the application of an investment licence or registration of an investor code before any investment can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or license may be revoked or not renewed by the relevant authority and the Fund's investments in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a foreign market requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country being frozen by the regulator resulting in investment activities for the Fund in that country being suspended. To mitigate this, the Manager will monitor closely the adherence of investment regulatory requirements in such countries.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
