| (ii) want an investment that complies with the principles of Shariah; | (v) require higher returns than Islamic fixed deposits at an acceptable level of risk. |

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

To provide regular income to investors through investments in Islamic debt securities and bonds which are acceptable investment under the principles of Shariah.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

- Minimum of 60% and up to 95% of the Fund's net asset value ("NAV") will be invested in sukuk.
- Minimum of 5% of the Fund's NAV will be invested in Islamic liquid assets acceptable under the Shariah principle.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund will invest in sukuk. Investments must carry a minimum long term or short term credit rating of **investment grade** as assigned by any domestic rating agencies. To contain credit risk, the Manager will ensure that the diversification of credit rating (and duration standing) in the sukuk portfolio mitigate the overall risk position of the portfolio.

The Manager may also take temporary defensive measures that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse market conditions, economics, political or any other conditions which the Manager deem detrimental to the Fund. The defensive measures that the Manager may undertake are in no way to be deviated from the mandates or breaching any laws and regulations. The Fund's strategies in yield enhancement for the portfolio will also be balanced with other investment needs of the Fund, such as liquidity and risk management. On liquidity management, the Fund will maintain sufficient amount of portfolio in liquid sukuk to accommodate redemption. As for risk management, the portfolio duration is kept at optimal level where yield enhancement can be optimised on risk adjusted basis, and at the same time, balanced with the need for containing portfolio's volatility.

Hence, during the temporary defensive period, the Manager may choose to increase the asset allocation by allocating more investment into risk free investments which are Islamic money market instruments and Islamic deposit in adverse market condition.

DISTRIBUTION

DISTRIBUTION POLICY - Income, if any, will be distributed during the financial year.

DISTRIBUTION MODE - Distribution (if any) which is less than or equal to the amount of RM300.00, will be automatically reinvested into the Fund based on the NAV per unit seven (7) Business Days after the ex-dividend date. No sales charge or costs shall be incurred or payable by the unit holders of the Fund ("Unit Holder(s)") for the reinvestment.

Distribution (if any) which is more than the amount of RM300.00, will be automatically paid out to the Unit Holders via cheque, unless the Unit Holder specifically requests for the distribution to be reinvested into the Fund by selecting the appropriate option in the application form. Unit Holders who opt for their distribution to be reinvested into the Fund will have their distribution reinvested into the Fund based on the NAV per unit seven (7) Business Days after the ex-dividend date. No sales charge or costs shall be incurred or payable by the Unit Holders for the reinvestment.

In the absence of the Unit Holder's written instructions, income distribution from the Fund will be automatically paid out to the Unit Holders via cheque. A Unit Holder must notify the Manager in writing seven (7) Business Days prior to each date fixed for the distribution of any change in his distribution instructions.

KEY RISKS

CREDIT AND DEFAULT RISK - This refers to the likelihood that the company issuing the sukuk and/or financial institution where liquid assets of the Fund are deposited may default. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings. Shariah-compliant municipal sukuk are subject to the risk that litigation, legislation or other political events, local business or economic conditions, or the bankruptcy of an issuer could have a significant effect on the issuer's ability to make payments of principal and/or profit. The Fund could lose money if the issuer or guarantor of a sukuk, or the counterpart to a derivatives contract, repurchase agreement or a financial institution, is unable or unwilling to make timely principal and/or profit payments, or to otherwise honour its obligations. Credit risk can be managed by performing continuous fundamental credit research and analysis to ascertain the creditworthiness of its issuer and/or financial institution. This risk refers to the possibility that the issuer of an instrument and/or financial institution will not be able to make timely payments of profit or principal repayment on the maturity date, where applicable. This may lead to a default in the payment of principal and profit and ultimately a reduction in the value of the Fund.

ISSUER RISK - The value of each individual sukuk that the Fund invests in may decline for a number of reasons which is directly related to the issuer, such as, the management performance, financial leverage and reduced demand for the issuer's goods or services. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio.

INTEREST RATE RISK - Generally, sukuk prices move in the opposite direction of interest rates; a rise in interest rates will generally cause a fall in sukuk prices and vice versa. The Fund will experience a capital loss or capital gain should the sukuk be sold before maturity. The interest rate risk here refers to the general interest rate risk of the country which may affect the value of the Fund's investments even if the Fund does not invest in interest bearing instruments. The sukuk indicative rate is influenced by the yield curve of the conventional interest rates. Thus, any movement in the conventional interest rates may be reflected in the indicative rates of sukuk as well. However, this does not in any way suggest that the Fund will invest in conventional fixed income securities where interest rates apply. All the investments carried out for the Fund will be in accordance with Shariah principles. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.

LIQUIDITY RISK - Liquidity risk exists when particular investments are difficult to sell, possibly preventing the Fund from selling such illiquid securities at a favourable price. The Fund's principal investment strategies that involve derivatives or securities with substantial market and/or credit risk tend to have greater exposure to liquidity risk. As part of its risk management, the Manager will attempt to manage the liquidity of the Fund through asset allocation and diversification strategies within the portfolio. The Manager will also conduct constant fundamental research and analysis to forecast future liquidity of its investments.

SHARIAH SPECIFIC RISK - The risk that the investments do not conform to the principle of Shariah may result in those investments being not Shariah-compliant. Should the situation arise, the Manager will need to take the necessary steps to dispose of such investments in accordance with the rules of divestment of non Shariah-compliant investments. If this occurs, the Fund could suffer losses from the disposal and thus, adversely affecting the value of the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.

FUND PERFORMANCE

The Fund has been in operation since 25 August 2000 and the Fund's financial year end is on 30 September. Effective from 1 January 2016, the Fund's benchmark was changed from Maybank Islamic Berhad's 12 months general investment account-i rate to Maybank Islamic Berhad's 12 months Islamic Fixed Deposit-i rate because Maybank Islamic Berhad's general investment account-i benchmark uses a Shariah principle (Mudharabah) which is no longer deemed as deposits, thus, leaving the Fund with an inappropriate benchmark. The Fund's benchmark are as follows:

- (a) Maybank Islamic Berhad's 12 months general investment account-i rate from 30 September 2007 to 31 December 2015;
- (b) Maybank Islamic Berhad's 12 months Islamic Fixed Deposit-i rate from 1 January 2016 to 29 September 2023; and
- (c) RHB Islamic Bank Berhad's 12-month Commodity Murabahah Deposit-i rate with effect from 30 September 2023.

The new performance benchmark is used in all performance reporting.
