### A) Fund Performance (continued)

For the six months ended 30 June 2023, the net asset value for Class SGD Acc and Class A SGD Acc (Hedged) of the Fund **increased 3.56%** and **2.03%**, outperforming the benchmark Custom Benchmark¹, which increased 1.41% (in Singapore Dollar Terms). Class USD Dist and Class A USD Acc of the Fund **increased 2.64%** and **2.59%** respectively, outperforming the benchmark¹, which increased 0.50% (in United States Dollar terms). Class A MYR Acc of the Fund **increased 8.79%**, outperforming the benchmark¹, which increased 6.49% (in Malaysian Ringgit terms). Class A MYR Acc (Hedged) of the Fund **increased 1.15%**, underperforming the benchmark¹, which increased 6.49% (in Malaysian Ringgit terms).

<sup>1</sup>Performance Splice: From 31 August 2010 to 30 June 2018 the benchmark was the MSCI World Health Care. From 1 July 2018 onwards the benchmark is the MSCI AC World Health Care.

The Fund is sub-managed by Wellington Management Singapore Pte Ltd and the commentary that follows reflects the views of the sub-manager.

The Fund's outperformance during the period was primarily driven by strong security selection. Stock selection in *Biopharma Large-cap* and *Biopharma Mid-cap* contributed to relative performance. One holding that contributed to relative performance was *ImmunoGen Inc*, a US-based biopharma company that makes antibody drug conjugates (ADC). Shares of *ImmunoGen Inc* rose after the company reported positive confirmatory clinical trial results for oncology drug, *Elahere*. The company's commercial launch of *Elahere* is also off to a strong start in the US.

The Fund's outperformance was partially offset by not owning **Novo Nordisk**, a Danish large cap biopharma company focusing on diabetes and insulin delivery systems. Shares rose after the company announced that their oral drug, semaglutide achieved its primary endpoint in phase 3 of the PIONEER PLUS study. The results demonstrated statistically significant and superior weight loss reduction in people with type 2 diabetes who were given higher doses of the drug versus those given a lower dose.

The top relative contributors to returns were *ImmunoGen Inc*, not owning *AbbVie*, *Seagen Inc*, *Exact Sciences Corp* and *Eli Lilly & Co*.

The key relative detractors were not owning **Novo Nordisk**, not owning **Intuitive Surgical**, **AdaptHealth**, not owning **Stryker** and **Illumina**.

In terms of country exposure, investments in the **United States** generated most of the Fund's outperformance.

As at end June 2023, the Fund had the following country asset allocation: **United States** (73.84%), **United Kingdom** (7.70%), **Switzerland** (5.07%), **Japan** (3.67%), **Netherlands** (2.08%), **China** (1.87%), **Ireland** (1.65%), **Denmark** (1.65%), **Belgium** (1.32%), **Brazil** (0.37%) and **Canada** (0.20%), with the remainder held in cash (0.58%).

### A) Fund Performance (continued)

### **Economic and Market Review**

The **Health Care** sector was off to a slow start this year, as the MSCI AC World Health Care Index declined 2.4% during the first quarter. The portfolio underperformed the benchmark by 87 basis points during the first quarter (in SGD terms). Within the index, performance was weakest in the **Health Care Services** and **Biopharma Mid-cap** sectors.

The second quarter of 2023 the MSCI AC World Health Care Index had strong performance and rose 4.2% over period, and the portfolio outperformed the benchmark by 400 basis points in SGD terms. Within the index, performance was strongest in the **Health Care Services** and **Medical Technology** sector.

### Outlook and Fund Strategy

Groundbreaking innovation, supportive valuations and business models positioned to show resilience through the cycle should benefit long-term investors in the sector.

Within biopharma, we continue to find a rich environment for innovation. We anticipate continued developments in disease areas such as Alzheimer's disease, metabolic diseases and cancer as well as companies discovering drugs using new modalities such as messenger RNA, RNA interference and gene therapy. We expect the fundamental backdrop and resilient earnings of large-cap biopharma to be a tailwind in a potential recessionary environment. SMID-cap biopharma companies also remain well-positioned as sources of innovation and potential solutions to pipeline gaps for larger companies. We have seen M&A activity of companies with long patent life pipeline products increase and expect this trend should continue. Valuations remain attractive relative to history and upcoming clinical readouts creates a breadth of opportunities.

We believe medical technology innovation has never been stronger due to advancements in technology development, engineering capabilities and integrated informatics. Leading companies gained scale over the last decade and are positioned to drive better organic growth. These include categories in the earlier stages of clinical penetration and geographic expansion such as diabetes, TAVR and mitral valve therapies, genetic sequencing and downstream diagnostics, and robotic surgery. Inflationary and supply chain pressures have begun to stabilize and remain balanced by less GDP-growth sensitive demand for therapies. We are focused on companies with strong organic growth and superior business models to navigate this macro environment.

**Health Care Services** companies remain well-positioned to help solve the societal challenge of rising health care costs, and some will benefit from the ongoing transition from a fee-for-service to a fee-for-value care system. Amidst near term volatility, we are watching Medicare Advantage utilization trends and looking for mispricing opportunities. We favor managed care businesses and companies focused on improving patient outcomes while reigning in costs.

### M) Soft dollar commissions/arrangements

UOB Asset Management has entered into soft dollars arrangements with selected brokers from whom products and services are received from third parties. The products and services relate essentially to computer hardware and software to the extent that they are used to support the investment decision making process, research and advisory services, economic and political analyses, portfolio analyses including performance measurements, market analyses, data and quotation services, all of which are believed to be helpful in the overall discharge of UOB Asset Management's duties to clients. As such services generally benefit all of UOB Asset Management's clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. The Manager confirms that trades were executed on a best execution basis and there was no churning of trades.

The Sub-Manager, Wellington Management Singapore Pte Ltd and their affiliates (collectively, the "Wellington Management Group") may utilise external research provided by broker/dealers and independent, or third-party research firms in their investment decision-making process ("Research Services"). These Research Services include written research material, conversations with analysts at the research firms, meetings with corporate management and access to experts in a variety of fields, such as government officials, doctors, researchers, lawyers and scientists.
